## Unit 9 – Background & Borders

### Objectives:

- ✓ Understand CSS backgrounds & borders.

### Project Structure

- A project called **CSS-E.M.A901** (this will be your root folder) is provided to you
- Put your work for each problem in corresponding folder inside root folder

### Problem 1:

In this task we want you to add a background, border, and some simple styling to a page header:

1. Give the box a `5px` black solid border, with rounded corners of `10px`.
2. Add a background image (use the URL `balloons.jpg`) and size it so that it covers the box.
3. Give the `<h2>` a semi-transparent black background color, and make the text white.

Expected output:

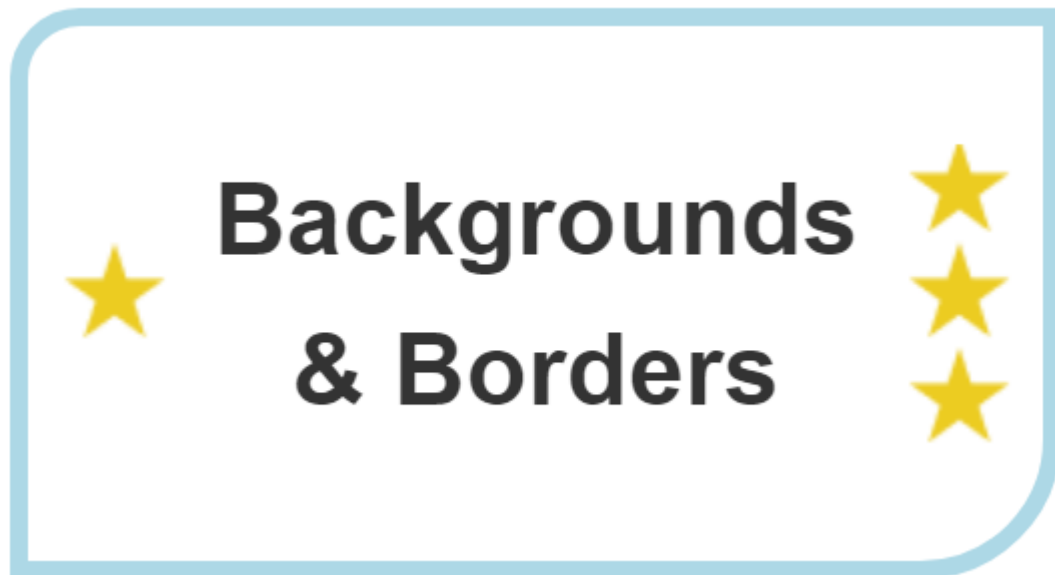

### Problem 2:

In this task we want you to add background images, a border, and some other styling to a decorative box:

1. Give the box a `5px` lightblue border, and round the top left corner `20px` and the bottom right corner `40px`
2. The heading uses the `star.png` image as a background image, with a single centered star on the left and a repeating pattern of stars on the right.
3. Make sure that the heading text does not overlay the image, and that it is centered — you will need to use techniques learned in previous lessons to achieve this.

Expected output:

-- THE END --
