## Unit 10 – Styling Images & Forms

### Objectives:

- ✓ Understand some values and units to style images and forms

### Project Structure

- A project called **CSS-E.M.A1001** (this will be your root folder) is provided to you
- Put your work for each problem in corresponding folder inside root folder

### Problem 1:

In this task, you have an image that is overflowing the box. We want the image to scale down to fit inside the box without any extra white space, but we do not mind if some part of the image is cropped.

Expected output:

### Problem 2:

In this task, you have a simple form. Your task is to make the following changes to the way this form looks:

1. Use attribute selectors to target the search field and button inside `.myform`.
2. Make the form field and button use the same text size as the rest of the form.
3. Give the form field and button `10px` of padding.

4. Give the button a purple background, white foreground, no border and rounded corners of 5px.

Expected output:

Keywords	<input type="text"/>	<input type="button" value="Search"/>
----------	----------------------	---------------------------------------

-- THE END --
