Contents

CODE:	**CSS-E.M.A1304 (House Design)**
TYPE:	**Medium**
LOC:	**N/A**
DURATION:	**150 MINUTES**

Working tools and delivery requirements

- **Working tools**: Visual Studio Code
- **Delivery**: Source code in a compressed archive (zip extension is required).

Technologies

The product illustrates:

- HTML and CSS Essentials
- Practice to use HTML and CSS to create a static website

Technical Requirements

- Follow the standard naming and coding convention.
- Given a file called **css-e.exams.opt1.zip**, extract and use it as your root project
- To submit your work you must zip and add your account to the zip file.
  - Example if your account is AnhNV then you must create a project called:
    AnhNV_css.exams.opt1

Problem 01: Build a Responsive website

Overviews:

You are working as Front-end Developer for FA House the leading Design website. You have to implement the new site as the old one is so out-of-date. Given the design from **Inshock desktop.png** file for desktop and **Inshock mobile.png** for mobile, you have to implement the layout for the new website. Other resources are stored inside **resources** folder.

Figure 1 - Website overview

Requirements:

1. The Layout must match the design
2. Website is clean and easy to follow
3. UI must be Responsives
